

FOR IMMEDIATE RELEASE

SightLogix® Welcomes George Tavares As NE Director Of Sales.

Princeton, NJ (November 18, 2009) – SightLogix®, the leading supplier of automated [outdoor surveillance](#) cameras for wide area and [perimeter security](#), welcomes George Tavares as director of sales for the Northeast region. Tavares will drive sales of SightLogix edge-based [video analytics](#) solutions in the Northeast United States and Eastern Canadian regions while supporting customers with his expertise in engineering, consulting, manufacturing, design and integration.

Mr. Tavares brings a wealth of experience to SightLogix customers through his in-depth knowledge of IP video, wireless communications and access control systems. He previously worked for Mosler, Northern Computers (now part of Honeywell), and as a Security Consultant for NASA, TAC and other New England-based integration firms. SightLogix customers will benefit from Tavares' track record and ability to apply leading-edge solutions through his extensive managerial and professional engineering experience protecting critical infrastructure and key assets.

“We are thrilled to have George join our team to help us expand opportunities as SightLogix systems continue to redefine the performance and economic parameters for outdoor surveillance and security,” said Dan Hearn, Vice President of Sales, SightLogix. “George's experience working with customers and his vast technical knowledge are a great boost to our efforts in the Northeast and Canadian regions.”

“SightLogix is clearly leading the industry in the application of video analytics to outdoor security,” said Mr. Tavares. “Users want dependable, efficient systems that perform well outdoors and deliver a sound return-on-investment. SightLogix [intelligent video](#)

[surveillance](#) systems offer expanded coverage capabilities to enable instantaneous real-time response while aiding forensic investigations. I see great potential for rapid growth of these unique capabilities.”

SightLogix’ products include long and wide-range SightSensor™ cameras in both visible and thermal spectrums, SightTrackers™ that automatically steer PTZ/dome cameras, and SightMonitor™ GPS target display software. Capable of operating in harsh outdoor conditions with a temperature range of -50C to +70C (-58°F to +158°F), SightLogix systems meet NEMA-4X enclosure standards, ensuring that they operate at peak efficiency regardless of climate.
